

Press Release

Radnor, PA

September 3, 2009

Citadel Plastics Holdings, a portfolio company of **Wind Point Partners**, today announced that it has completed the acquisition of the assets of **Fiberfil Engineered Plastics Inc.**

For almost 60 years, the name Fiberfil has been synonymous with thermoplastics compounding. Founded in 1952 by Rex Bradt, Fiberfil blazed a new trail and pioneered the plastics compounding industry. Fiberfil was the first company to incorporate glass fiber and other reinforcements into thermoplastics.

"We are extremely excited about the acquisition of Fiberfil's assets as we continue to broaden Citadel's product portfolio and geographic reach" said Mike Fitzpatrick, Citadel's Chairman and CEO. Mike Huff, Citadel's Chief Operating Officer, added, "The addition of Fiberfil's technology, product line, and customer relationships is a very important step for us. We are proud to add Fiberfil's storied history of leadership to the Citadel family."

"Fiberfil has been a preeminent name in plastics compounding during my entire career. We are very excited that the capabilities of the Fiberfil product line will complement our existing Aclo and Matrixx business" added Keith Rodden, President of The Matrixx Group.

Citadel plans a smooth and seamless transition of Fiberfil's product line to existing Citadel plants in Guelph, Ontario, Evansville, Indiana and Houston, Texas. The Fiberfil brand and product line will be maintained by Citadel. Fiberfil's customers will benefit from Citadel's multiple plant locations, broad product portfolio, and technology. The Stoney Creek, Ontario plant will be operated by the Sellers through a transition arrangement during the transition period.

John Wilkie, President and CEO of Fiberfil, said "Citadel's experience in the compounding industry and strong financial position will ensure that Fiberfil's customers will continue to receive excellent products and customer service."

Citadel Plastics Holdings owns The Matrixx Group, Aclo Compounders, and Bulk Molding Compounds, Inc. Citadel, which is managed by former Rohm & Haas COO, Mike Fitzpatrick, is responsible for the design and execution of a value creation strategy in the plastics compounding market. The majority owner of Citadel Plastics Holdings is Wind Point Partners. www.citadelplastics.com

Wind Point Partners is a private equity investment firm with approximately \$2.5 billion in capital under management.
